Superior protection and durability with Double Palm Leather Welding Gloves. Engineered for maximum safety during welding tasks.

FEATURES

- Double palm leather welding gloves are heavy-duty protective gloves designed for welding applications.
- Double layer of durable leather on the palm and fingers, providing excellent heat and abrasion resistance.
- These gloves are specifically crafted to shield welders from sparks, molten metal, and other potential hazards encountered during welding processes.
- These gloves are essential safety gear for welders to ensure their hands remain well-protected in high-temperature environments.
